

A different way to World Wide Web

CloudBringer Internet

CloudBringer is a new kind of Internet service from SKYFY.

Reliable and secure, it is faster than broadband and comes packed with innovative features like *Bandwidth DualBoost^{BETA}*, designed to intelligently optimize bandwidth capacity of your connection to deliver faster speed on-demand, where you need it most.

Instant HD streaming, High Resolution video chat and uninterrupted online gaming – CloudBringer does it better and it does it faster.

It's not dialup. It's not cable. It's a different kind of Internet.

CloudBringer Internet Communities

Over the years, we worked hard to create Internet service that would better suit communities. We wanted to create a value not just for individual residents, but also for community as a whole.

So, we created *CloudBringer Communities* service, designed specifically for communities like yours:

1. Super fast, uncongested Internet.

Faster internet has a direct relationship to your online experience. With faster connection, you can stream and chat in HD video, you can share and collaborate instantly and in real time, you can play with friends online with no delays or buffering. Life is better with fast Internet.

2. Special community pricing.

Once your community has reached its pre-registration goal, we will know that enough residents in your community want CloudBringer services. Taking that into account, we will commit our timeline and resources to build and install CloudBringer services in your community, and offer special pricing to anyone in your community interested in CloudBringer services.

3. Free community-wide WiFi.

We have long roots in WiFi and Wireless Internet. Since 2004, we have installed thousands of wireless networks and WiFi services in resorts, condominiums, apartment buildings and complexes, shopping malls and plazas, and many public places.

We believe in WiFi, and think it is one of the easiest and most convenient ways to get online and stay connected. In fact, each year more and more smart devices use WiFi as the only means of connecting to the Internet.

So, when we created CloudBringer, we felt free community-wide WiFi Internet access would bring significant benefit and add further value to your community. And it's about building better communities.

\$240 activation fee (one time or 12 monthly payments of \$20) + taxes & fees – No Contract
Free service guaranteed for at least 5 yrs

24/7/365 Live Customer Support

Faster than broadband statement is based on average American download speeds of 5.8 mbps, compared to CloudBringer 12 mbps service plans. Connection speeds may vary and are not guaranteed. Actual speeds may vary based on end-user devices and Internet factors including site traffic, content server capacity, and use of other SKYFY CloudBringer products and services.

All service plans require High-Speed Gateway Modem equipment - free with a fully refundable \$75 security deposit.
Taxes and regulatory fees may apply. Pricing may not be available in all areas and may be subject to change without notice.

Qualification and Pre-registration

To qualify for service, each community must reach their pre-registration goal. The pre-registration goal is the percentage of homes in your community that need to pre-register for your community to qualify for service.

All communities are different, in size and density, as well as speed and ease of construction and delivery of CloudBringer services. So, in those communities that are more complicated to build, we wanted to make sure that enough residents want CloudBringer service.

Based on that, we determined community pre-registration goals by grouping communities into three tiers:

- Communities expected to be easy to build and install: 25% goal.
- Communities expected to be more complicated to build and install: 50% goal.
- Communities expected to be most complicated to build and install: 75% goal.

How to Sign Up

1. Pre-register and pick your plan

Pre-register online at www.getcloudbringer.com or by phone at 1-888-977-5939 and select CloudBringer Home service plan that you think will best work for you (don't worry, you can change to a different plan anytime).

A \$5 pre-registration deposit collected during signup process will be applied toward your first month's invoice. Pre-registration deposits are refunded in the event your community does not qualify for *CloudBringer Communities* program.

2. Schedule Install

Once your community reaches its pre-registration goal we will announce our timeline and begin scheduling installations. We will reach out to you and ask to schedule your installation appointment with a CloudBringer Team Member at a time convenient for you.

3. Enjoy CloudBringer

Based on your CloudBringer service package, we will professionally install and configure your services. Before we leave, we will make sure that you are able to connect with all your devices and answer any questions you might have so that you can sit back, relax and enjoy the Web!

Features

Super Fast

2X faster than today's average American broadband, CloudBringer quickly gets you online and keeps you connected so you can spend less time waiting and more time doing things you love.

Bandwidth DualBoost ^{BETA}

Based on SKYFY Symmetric Transmission Technology, DualBoost is built into all CloudBringer services and works by dynamically reallocating under-utilized bandwidth based on demand of your online session.

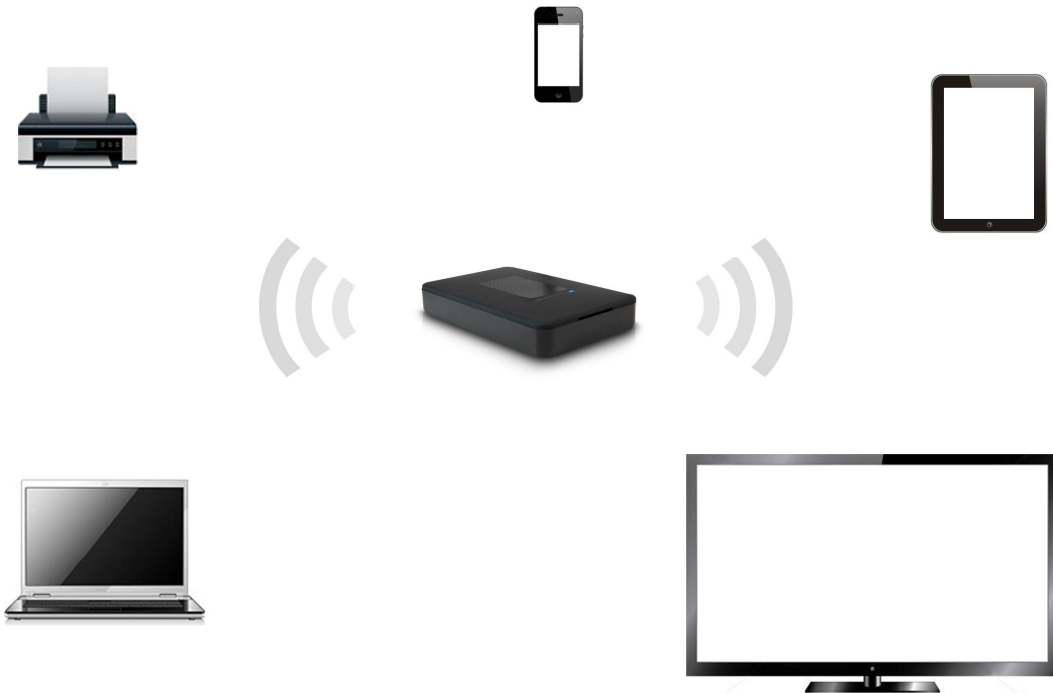

Whether you're playing with friends online, video chatting, or uploading family videos, you will spend less time waiting and more time enjoying.

Home WiFi

With fast and powerful WiFi built-in with every Gateway Modem, you will get coverage all over your home and will be free to use any WiFi-enabled device to wirelessly enjoy CloudBringer Internet anywhere in your home.

We will install your new WiFi network, configure security settings, make sure all your devices can connect, and will provide 24/7 support in case you need help in the future. We will even help you with other home networking devices like network printers and media entertainment centers. All you have to do is sit back and enjoy!

Home Phone

With low international rates and unlimited US and Canada calling, you can stay in touch for a fraction of a cost of a traditional phone line.

Packed with Powerful Features:

- Enhanced Voice Mail
- CallerID with Name
- Call Waiting with CallerID
- Return Call *69
- Privacy & Blocking
- Call Forwarding with Unavailable, Call Hunt/Find Me, Multi-Ring
- 3-Way Calling
